PROFESSIONAL SUMMARY

Detail-oriented **Information Technology Graduate** with a unique cross-discipline background in **IoT Systems, Artificial Intelligence, and Full-Stack Development**. Proven track record in designing enterprise-grade solutions, including a robust **RBAC system for 19 user roles** to secure data silos at **HeveaBoard Berhad**. Currently completing the **Google Business Intelligence Professional Certificate** to master the transition from data collection to **actionable business insights**. **Published researcher** recognized for innovation in smart agriculture.

SKILLS & TECHNOLOGIES

- Data & Business Intelligence:** SQL, BigQuery, Tableau, Data Mining, ETL Pipelines, Data Visualization, Machine Learning.
- Software & Web Engineering:** PHP, Java, JavaScript, C++, HTML5/CSS3, Role-Based Access Control (RBAC), Schema Matching.
- IoT & Embedded Systems:** ESP8266, Arduino IDE, Telemetry, Sensor Integration, Edge AI, Computer Vision (TensorFlow).
- Tools & Methodologies:** Git/GitHub, Visual Studio Code, Laragon, Agile Methodology, Software Development Life Cycle (SDLC).

PROFESSIONAL EXPERIENCE

Information Technology Intern | [HeveaBoard Berhad](#), Negeri Sembilan | *August 2025 – January 2026*
Project: [HeveaBoard OneView™](#) (Industrial Traceability & BI Platform)

- Enterprise Security:** Developed a robust **Role-Based Access Control (RBAC)** system for **19 user roles**, securing data silos across **all Production sections**, including Press, Sanding, Packing, Loading, SCP, and Lab.
- Traceability Engineering:** Engineered the **Trace™ module**, a sequential tracking tool for industrial Board IDs, **increasing production visibility** and quality audit efficiency.
- Data Integration:** Built a high-performance **CSV Import/Export engine** to process large-scale industrial datasets with **strict UTF-8 validation** and schema matching.
- BI Visualization:** Designed a **dynamic reporting dashboard** for management, enabling **real-time production metrics** through automated chart generation.

Information Technology Intern | [Syarikat Pemasaran Karyaneka Sdn Bhd](#), Kuala Lumpur | *February 2022 – July 2022*

- Infrastructure Management:** Monitored and maintained internal IT systems and digital marketing data repositories.
- Technical Support:** Resolved hardware and software issues for staff, maintaining **99% system uptime**.

EDUCATION

Bachelor of Information Technology with Honours | [Universiti Tun Hussein Onn Malaysia \(UTHM\)](#) | *March 2026*

- Classification:** Second Class Honours (Upper) | CGPA: 3.34/4.00
- Achievement:** Published Research Author in [AITCS](#) Journal ([Vol. 6 No. 2 \(2025\)](#)).
- Specializations:** Machine Learning, Data Science, AI, and Database Systems.

- Achievement: Dean’s List Award (All Semesters) | CGPA: 3.83/4.00

 TECHNICAL PROJECTS

[IoT-Based Plant Growth Monitoring System](#) (Bachelor Final Year Project)

- **Hardware Stack:** Integrated **ESP8266** with DHT11, Soil Moisture, LDR, and Raindrop sensors for real-time telemetry.
- **AI Implementation:** Integrated **TensorFlow & Computer Vision** to automate plant disease detection via image analysis.
- **Web Ecosystem:** Developed a **full-stack dashboard** using **PHP and MySQL** for remote data monitoring and alert management.

[EzyQ Food Ordering System](#) (Diploma Final Year Project)

- **Process Optimization:** Developed a **PHP-based queue management system** that digitalized cafeteria operations and reduced peak-hour congestion.
- **SDLC Documentation:** Authored full technical specifications (ERDs, DFDs) and conducted comprehensive **Unit and UAT testing**.

 LEADERSHIP & CERTIFICATIONS

- **Google Business Intelligence Professional Certificate** | Google (In Progress)
- **Head of Sports Exco** | Biro Kebudayaan Mahasiswa/i India, UTHM
- **Vice President** | Kelab Pelajar Teknologi Maklumat, PSMZA
